INTERNSHIP Hiring

About the YASHIO KENYA

- Our vision is 'Realizing a world where people can create their own future'.
- We are going to build schools all over the world to realize it.
- We believe that the essence of education is to provide the "Survival Intelligence" necessary for society.
- We came from Japan to provide skills and jobs to Kenyans.
- We provide a service called "Skilled". We provide a range of services from the development of educational content ,systems , to post-learning job support for persons.
- We welcome anyone who can help us achieve this goal.

Program Summary

There are development projects using a variety of technologies, ranging from small to large projects, so you can gain practical experience working on a variety of projects and improve your skills. In your role as a Software Engineer, you will work in a web application development team and perform the following tasks.

- Development of Web APIs, Web front-end applications, and native applications
- System design planning.
- Project Management.
- Design API interfaces for systems.
- Write and maintain comprehensive unit tests.
- Data analysis of user behavior, etc.
- Propose system improvements based on data analysis.
- Develop and implement business strategies together with the management team from a technical perspective.

Our Offer

- Gross salary of Ksh. 20,000 / monthly plus Commission based on performance.
- Opportunity of being absorbed as a permanent employee after three months based on performance.
- Support from a professional international team.
- Well-developed development environment. We will lend you a PC and Monitor with sufficient specs for your development.
